### What is TexasSure?

TexasSure, the "financial responsibility verification program" was created by the 79<sup>th</sup> Texas Legislature. A program was established to verify whether owners of motor vehicles have established financial responsibility.

Texassure is designed to reduce the number of uninsured motorists in this State; operate reliably; be cost-effective; sufficiently protect the privacy of the motor vehicle owners; sufficiently safeguard the security and integrity of information provided by insurance companies; identify and employ a method of compliance that improves public convenience; provide information that is accurate and current; and be capable of being audited by an independent auditor.

TexasSure users include the DPS, sheriffs, local police, and vehicle registration offices. These users obtain accurate and timely insurance information on a given vehicle promptly upon request. For example, law enforcement officers can electronically confirm whether or not a registered vehicle has insurance coverage in effect.

### Unmatched Notices

TexasSure is able to match over 99% of all reported auto insurance policies to a registered vehicle. Beginning in November 2009, TexasSure will send a notice to the less than 1% of insured customers that cannot be matched to their registered vehicle. Customers will be provided with the insurance information submitted by their insurance company and specific guidance to help determine the reason for the non-match.

### Uninsured Notices

There are approximately 4 million registered passenger vehicles that are potentially uninsured. Beginning in the spring of 2010, TexasSure will contact the registered owners of these vehicles. Recipients will be provided with the vehicle registration information on file and specific guidance to help them correct the situation.
